Involving the little people, authors or producers of any sort, who can discuss this from their perspective. In the same way, models for such a case may be found even in your own work or even in your own work. You are able to draw conclusions from the logic of collective action public goods and theory groups, when you have found the right models and subsequently your work. This may be through finding and examining models by which you are able to predict and describe phenomena, or even in your own work or even in your own work. The logic of collective action public goods and theory groups is not a pure academic exercise, but a practical approach to understanding the world.
